

PUBLIC INTEREST DESIGN

North Saint Paul Living Streets Project

Design Workshop: ARCH 3250

Instructor: James Wheeler

Group Members: Aicha Boujnikh, Abbey Seitz, Francisco Tenorio, Rebekah Trad, Leah Bauch, Tara Werkmeister

CONDENSED LIVING STREETS GUIDE

WHAT IS IT?

The condensed version that we created highlights the key points covered in the original document in an abbreviated manor that will keep the reader engaged. This version is available in an electronic PDF version or a hard copy.

VISUAL PREFERENCE SURVEY

WHAT IS IT?

Through a door-to-door data collection method, current street conditions and rendered images with Living Streets elements are compared, to both educate community members on the plan, and gain an understanding of their preferences.

BIKE LANE RENDERINGS

RAIN GARDEN RENDERINGS

CARRY ON RAINGARDEN

Interactive Watershed Education

WHAT IS IT?

The Carry On RainGarden is a portable educational device that allows audiences to learn first hand about both the aesthetic qualities and the stormwater mitigating effects of rainwater gardens.

LIVING STREETS LAB

Innovation Solutions Through Play

WHAT IS IT?

The LivingStreetLab is a toolkit that allows the user to explore and learn the different components that make up Living Streets. The Living Street Box will be displayed in a location where users can build and play on their own, and used in workshops that promote sustainable community development.
